Dental Implant Education**

Philadelphia, Pennsylvania

October 2011 - June 2012

Course Director

Rick Ferguson DMD

Dr. Rick Ferguson lectures throughout the world on a variety of implant surgery and restorative topics. He is a clinical assistant professor at the University of Florida and the director of Implant Educators which runs a comprehensive course teaching general dentists and specialists how to become implantologists. Dr. Ferguson is a Diplomate of the ICOI, an Associate Fellow of the AAID and a visiting lecturer at the University of Miami. Dr. Ferguson has taught implant dentistry and hands-on bone grafting courses which have been attended by thousands of dentists over the last 15 years. He is currently in private practice in Davie, Florida.

Course Co-director

Robert Walinchus DMD

Dr. Walinchus is a hospital dentist who practices all forms of general dentistry with a strong emphasis on dental implants. His guidance and techniques have helped many dentists get started and advance rapidly in implant dentistry. Dr. Walinchus is an expert in CT Scanning/Computer Guided Surgery which is the cutting edge of implant dentistry today.

Restored Implants

For the treatment planning, placement a

Course Description

Learn to predictably treat your patients using dental implants. You will be encouraged to bring cases for review and you will benefit from one-on-one treatment planning. Our instructors will guide you in your acquisition of the knowledge and confidence to treat your own cases from start to finish. You will learn to use CT guided surgical techniques, participate in hands-on model workshops and observe and assist in live surgeries. Upon completion of this course you will understand why, when, and how patients can benefit from dental implant treatment.

Participants will be expected to demonstrate competency on all hands-on exercises and quizzes. Each participant will bring cases for treatment planning and review. Live surgeries will be observed or assisted at each session. Observation and assistance in live surgeries are required; dates will be announced at the first session. Attendees should also bring a laptop computer for CT guided software training.

Intro to implants, socket grafting and diagnosis
Hands-on workshops included

Rick Ferguson DMD
