

Phlebotomy techniques and the process of creating BC-PRP and PRF

8 hours of lectures and 8-hours of hands-on training for applying the lecture knowledge clinically

Location

Courtyard Marriott
2000 N Commerce Parkway
Weston, FL

Tuition: \$1500 Before May 31st
\$1600 After May 31st

August 5-6, 2023
8:30 am - 5:00 pm

Learn evidence-based science of blood concentrates for use in all surgical procedures.

This interactive presentation is designed for Dental Teams who want to improve clinical outcomes in their surgical practice. Participants will not only understand the uses of both liquid (Buffy-Coat PRP "BC-PRP") and solid blood concentrates (Platelet Rich Plasma, "PRF"), but also learn detailed step-by-step techniques for preparing and applying the protocols during surgical procedures. The dental staff can take the lead on this technology and perform the processing steps, leaving the clinician to focus on the surgical procedure.

Course Outline

- How PRP and PRF accelerates healing and prevent complications such as dehiscence and surgical site infections.
- Prevent dry-socket after extraction, speed soft tissue healing and decrease post-operative infection.
- Understand the step-by-step process for formulating platelet concentrates in both liquid and solid forms.
- Understand how to use PRP and PRF to improve the handling of bone grafting materials.
- Learn an inexpensive, scientifically proven method to enhance patients' hard and soft tissue healing using a simple centrifuge.
- Experience extensive hands-on practice performing phlebotomy techniques
- Understand the proper use of glucocorticosteroids to provide controlled post-operative inflammation.
- Understand how to administer glucocorticosteroids both orally and via intramuscular (IM) injection.
- Understand how to buffer local anesthesia to improve effectiveness in difficult-to-numb patients.

Dr. James Rutkowski

is a Pharmacist, Dentist, and has earned a PhD. in Pharmacology. He has authored multiple publications in peer-reviewed journals and textbook chapters.

Dr. Rutkowski is Editor-in-Chief of the Journal of Oral Implantology (JOI) and a Diplomate/Past-President of the American Board of Oral Implantology/Implant Dentistry (ABOI/ID). He lectures nationally and internationally on pharmacology, platelet concentrates, sedation techniques, and bone grafting as it applies to the dental practice.

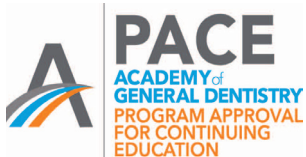

BONUS!

*Oral & IM Antiflammatory protocols to decrease post-op swelling and discomfort.

*Techniques to improve the effectiveness of local anesthesia.
